PROJECTS

E-Book Online Store

[Live Demo](#) [GitHub](#)

Tech Stack: **HTML5** · **CSS3** · **JavaScript** · **Responsive Design**

- Built a fully responsive online bookstore with product listings, shopping cart, and user-friendly navigation using pure vanilla JavaScript.
- Implemented dynamic cart state management and product filtering via DOM manipulation — no frameworks used.
- Applied mobile-first design principles and cross-browser compatibility using Flexbox and CSS Grid.

TastyBite - Food Delivery App

[Live Demo](#) [GitHub](#)

Tech Stack: **HTML5** · **CSS3** · **JavaScript** · **UI/UX Design**

- Developed an interactive food ordering platform featuring restaurant browsing, menu display, and a complete order flow.
- Designed card-based UI components and smooth micro-interactions to simulate a real-world delivery app experience.
- Used structured CSS Grid layouts with custom hover animations for a polished, pixel-perfect interface.

Personal Portfolio Website

[Live Demo](#) [GitHub](#)

Tech Stack: **HTML5** · **CSS3** · **JavaScript** · **GitHub Pages**

- Designed and deployed a fully responsive portfolio showcasing skills, projects, education, and contact info.
- Implemented smooth scroll animations, dynamic project cards, and a contact form using vanilla JavaScript.
- Optimised for performance and SEO-friendly semantic HTML; hosted live on GitHub Pages.

EDUCATION

B.Tech in Computer Science
